**TOOLS SOFTWARE**

**TEAM WORK**

# P R O J E C T PORTFOLIO

Here is a collection of projects that I have worked on.

## 01 Project UI/UX

create a user interface design with the idea of a baby equipment rental application called the Basurent Application

## 02 Project Data Visualization - Sales

Visualize data in the form of a Dashboard using Power BI Tools

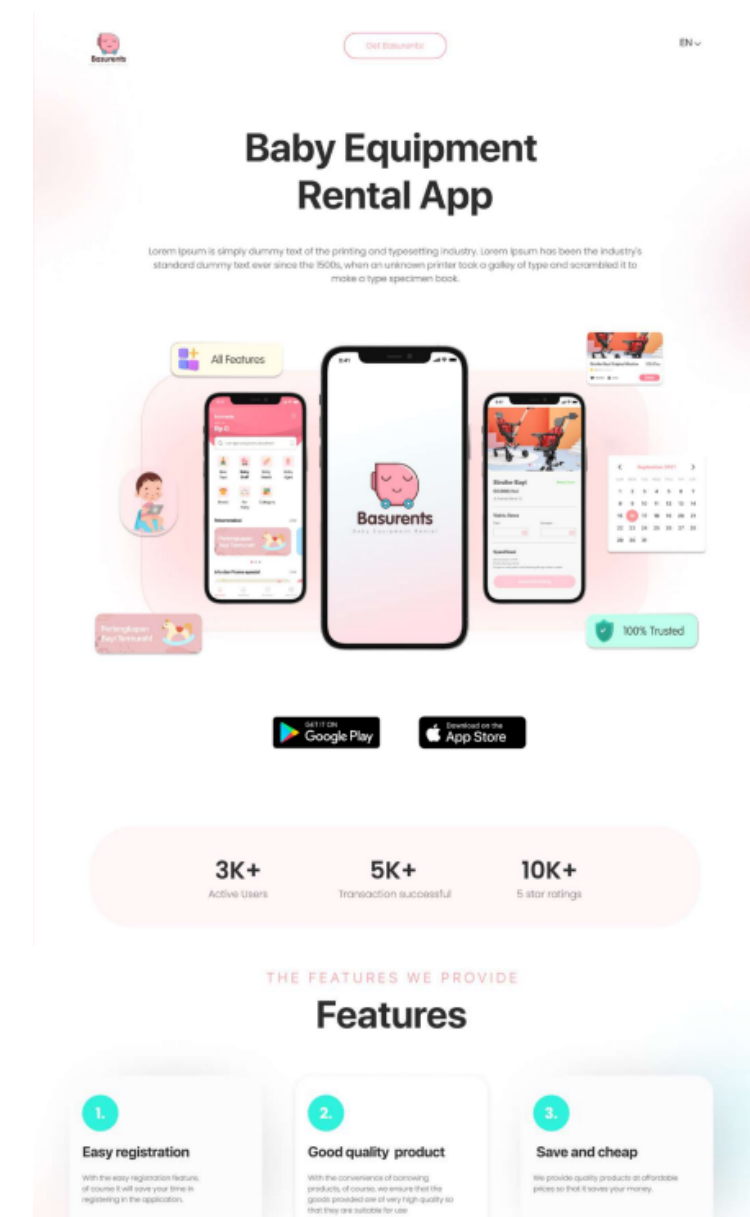

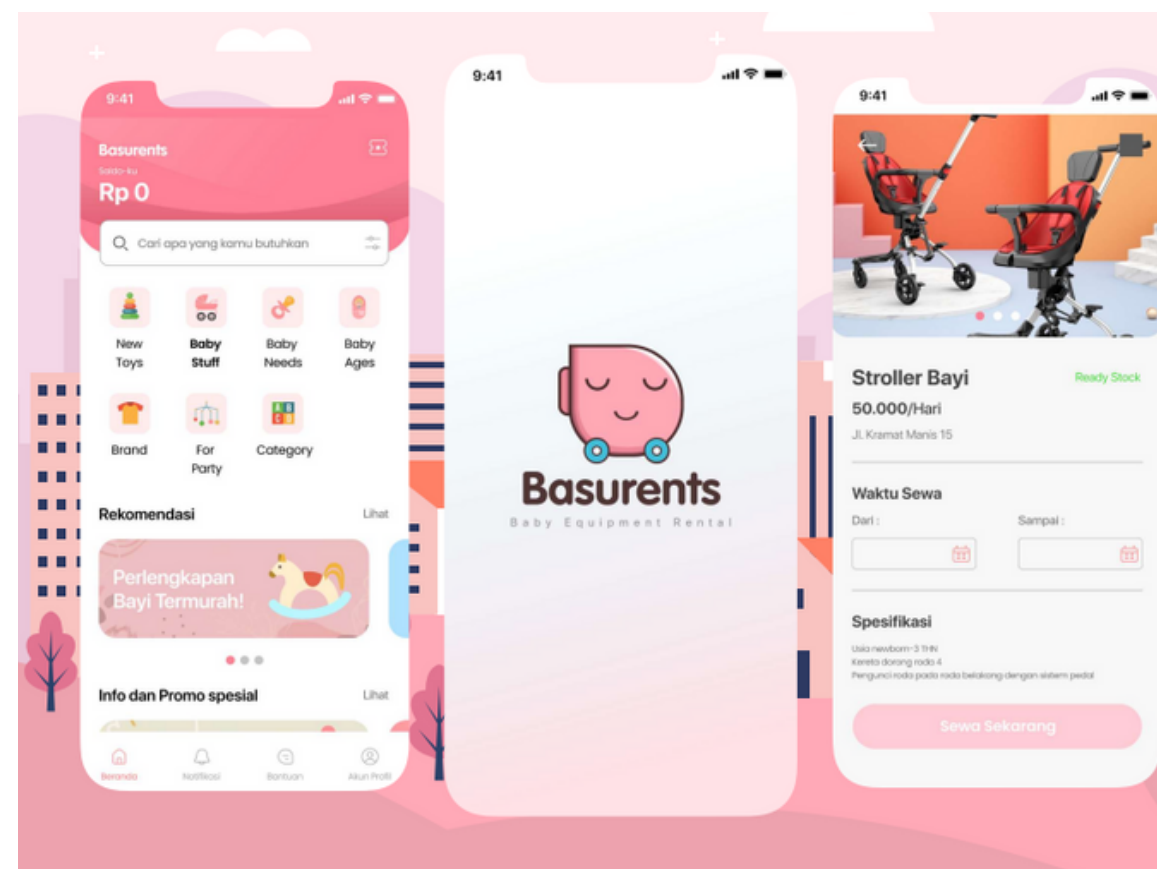

## 03 Project Data Visualization - Covid19

Visualize data in the form of a Dashboard using Power BI Tools

# P R O J E C T

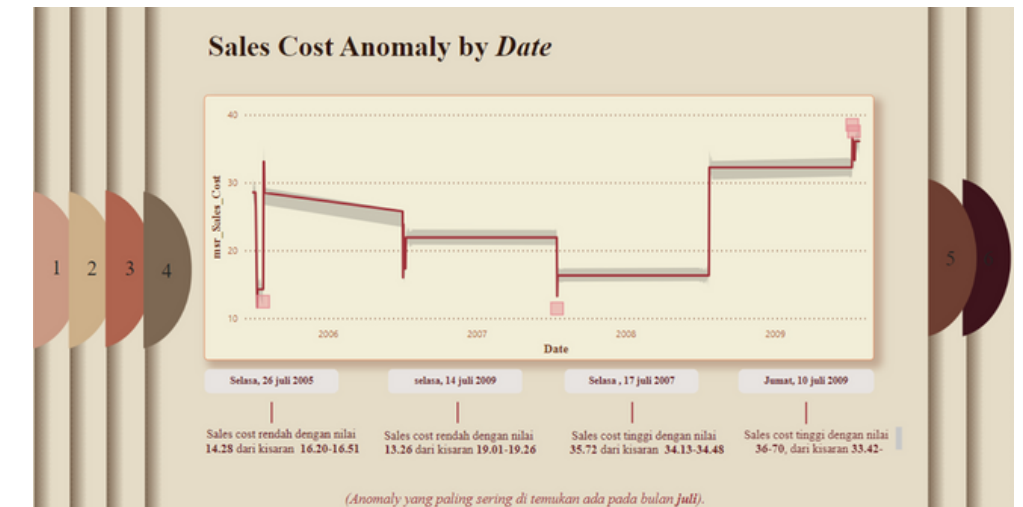

In this application, the solution offered is by requiring another way to have baby equipment without having to buy continuously because of the rapid growth of babies in an effort to reduce expenses and minimize the buildup and damage of unused items.

# 01

# P R O J E C T

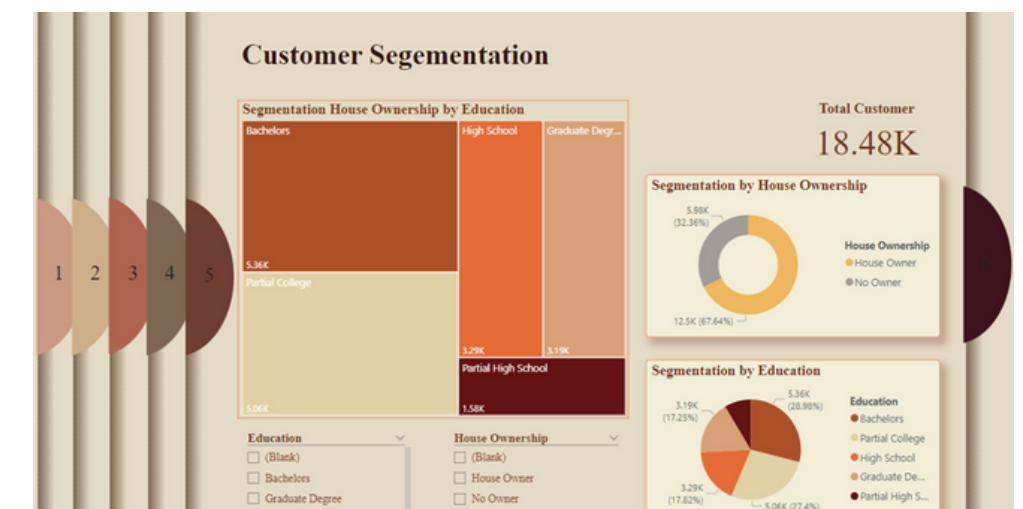

In making this data visualization refers to the dataset that has been determined, so as to produce a dashboard that contains information according to the needs of the data.

## COST ANOMALY

## FORCHAST PREDICTION

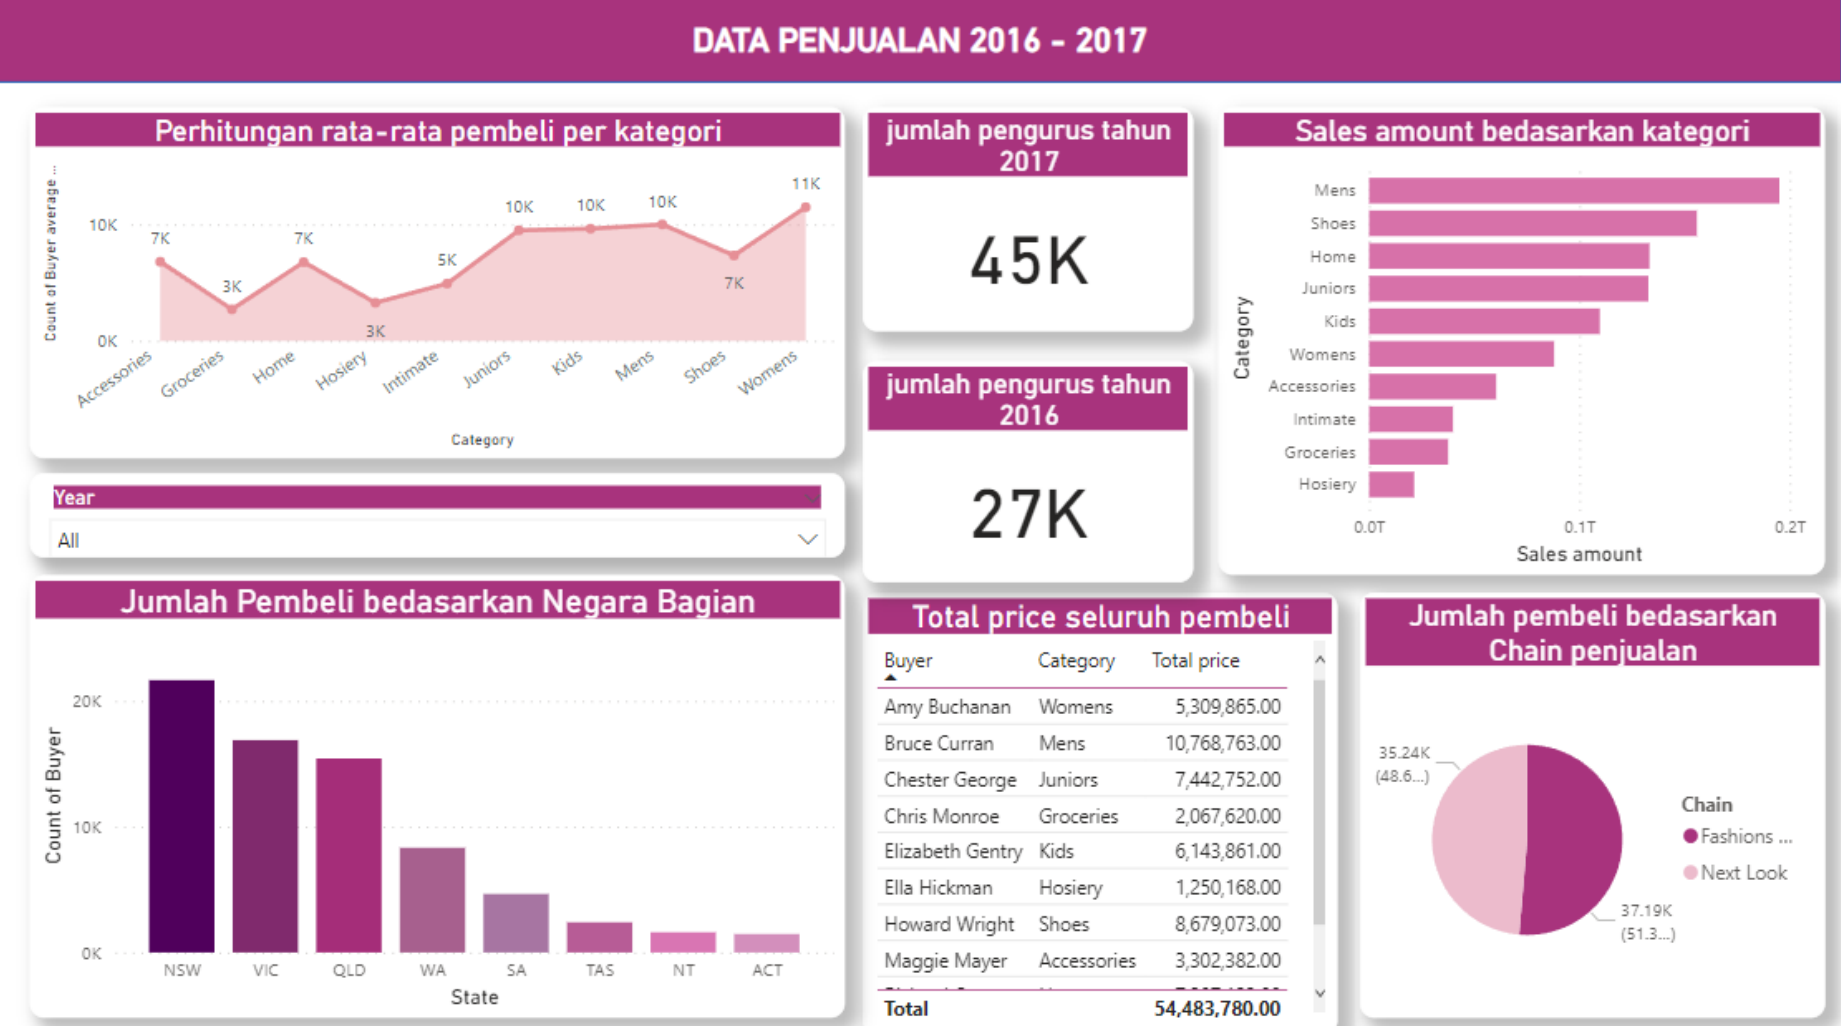

## CUSTOMER SEGMENTATION

# PROJECT

This visualization can describe and calculate buyer data data on company products or services through visual representations in graphs and diagrams based on existing data sets in the company.

02

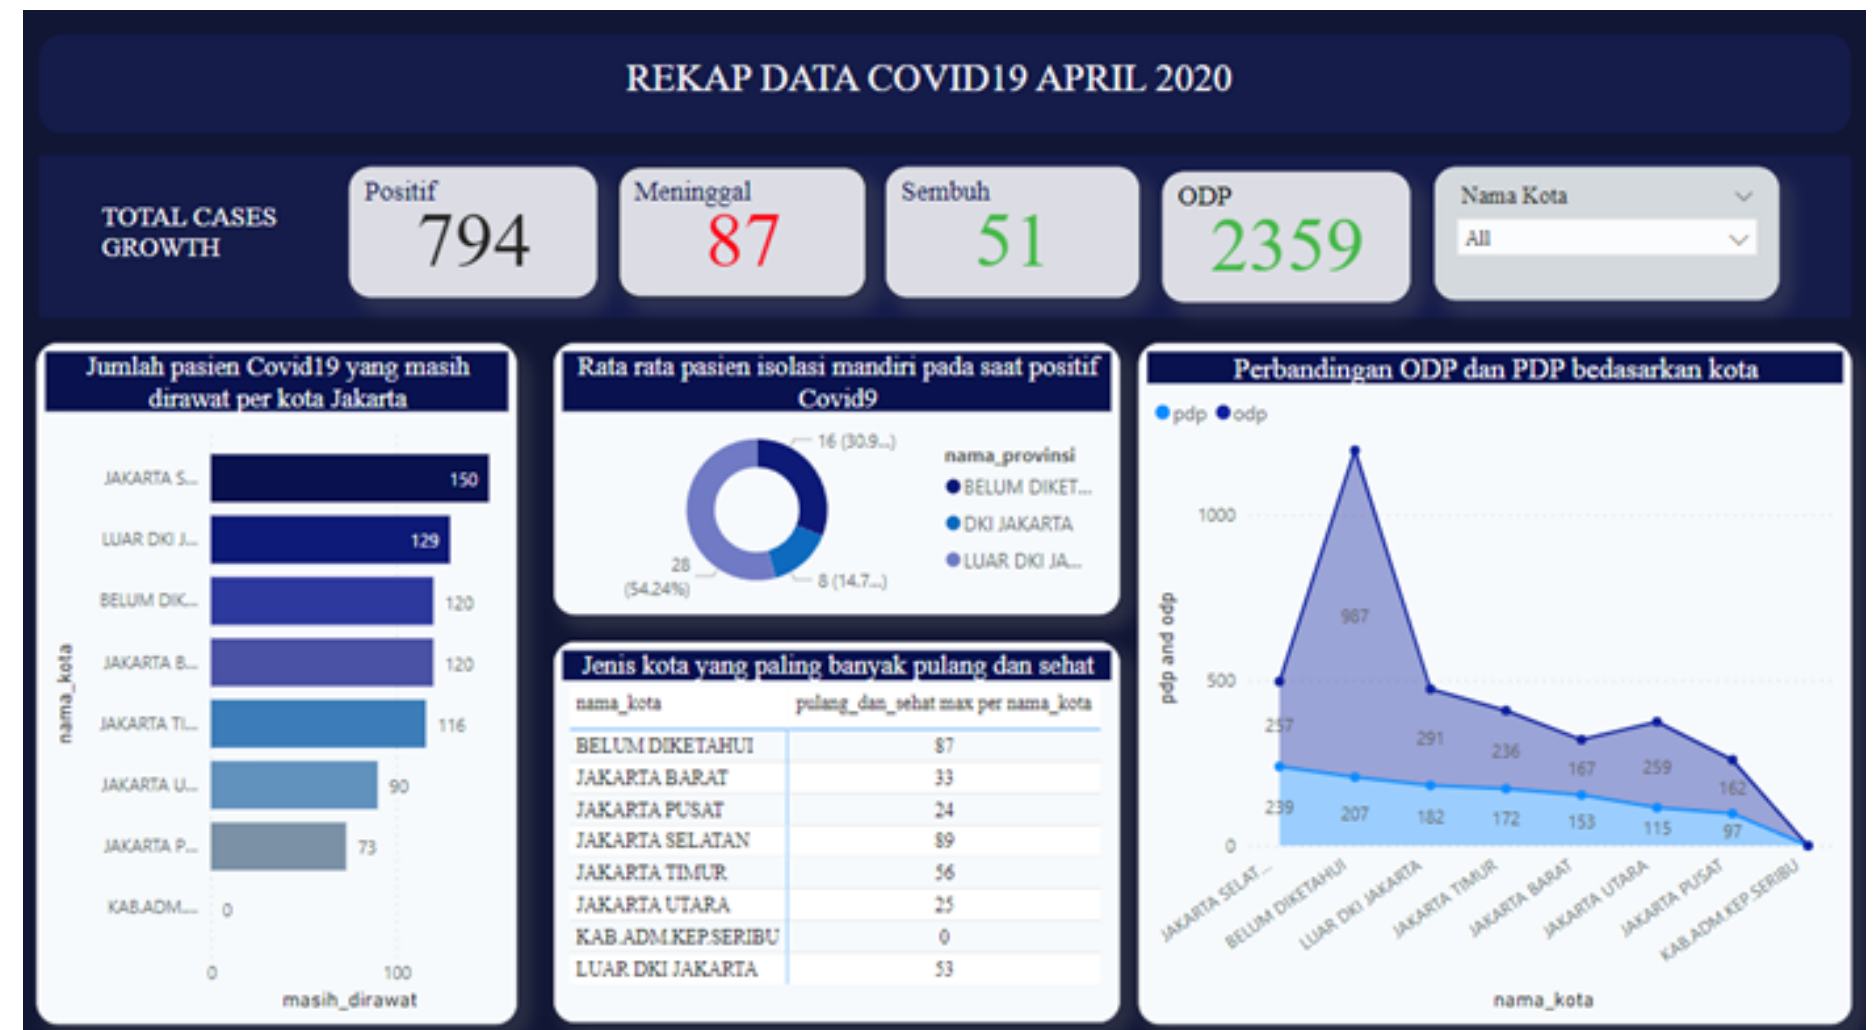

# PROJECT

This data visualization explains how the statistics of the distribution of covid19 patient cases in April 2020 specifically in the city of Jakarta.
