TEAM WORK

P R O J E C T **PORTFOLIO**

Here is a collection of projects that I have worked on.

01 Project UI/UX

create a user interface design with the idea of a baby equipment rental application called the Basurent Application

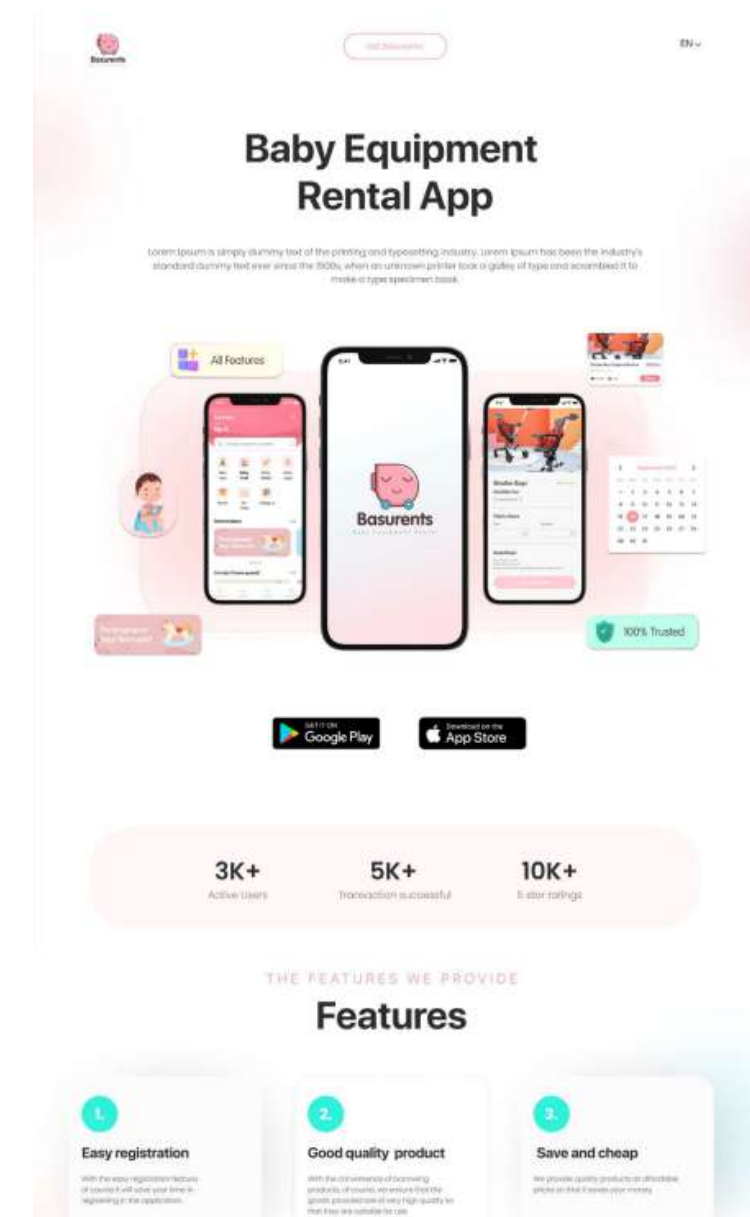

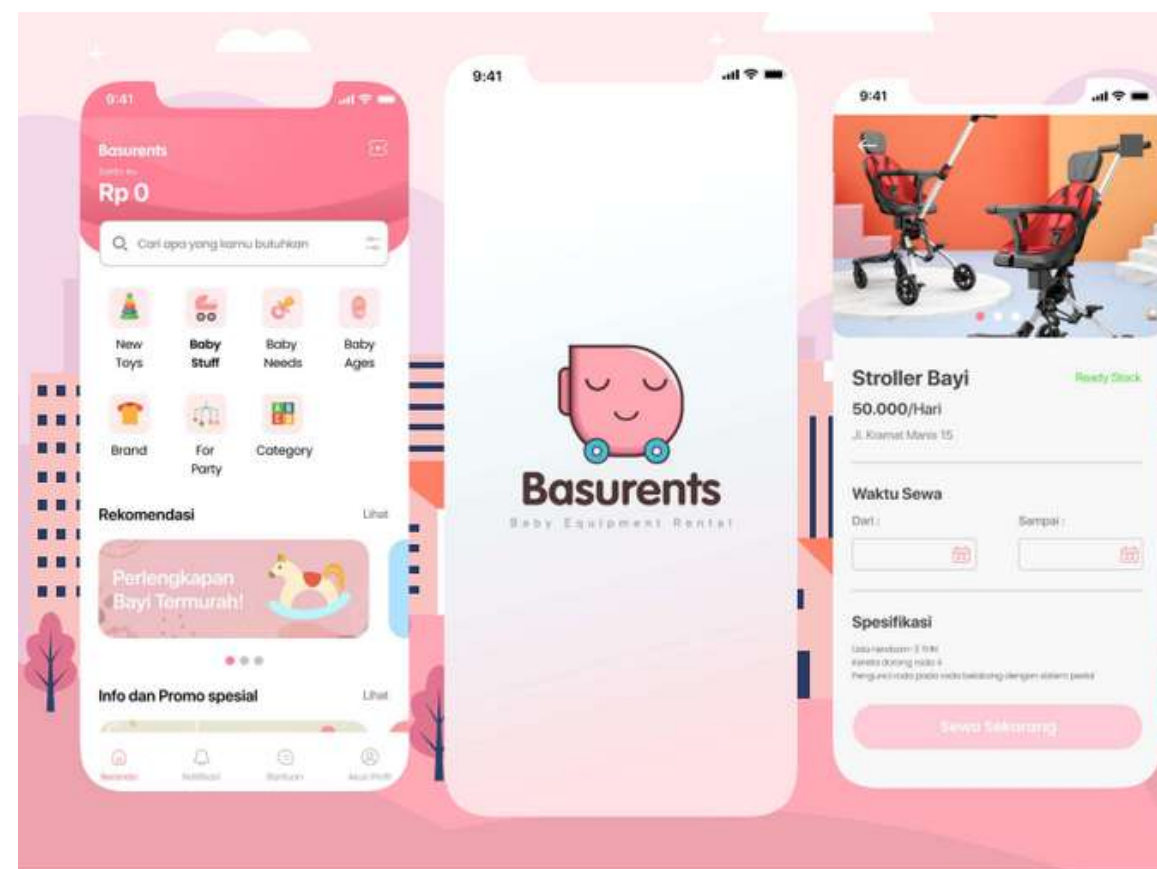

02 Project Data Visualization

Visualize data in the form of a Dashboard using Power BI Tools

P R O J E C T

In this application, the solution offered is by requiring another way to have baby equipment without having to buy continuously because of the rapid growth of babies in an effort to reduce expenses and minimize the buildup and damage of unused items.

01

P R O J E C T

In making this data visualization refers to the dataset that has been determined, so as to produce a dashboard that contains information according to the needs of the data.
